Kermi shower enclosures with a fresh look

The color white Soft for surface design is undoubtedly a big topic in bathroom design. Kermi celebrates this new trend colour with the special White Line collection.

Black and white - black Soft and white Soft - are trendy surface colours in the bathroom of 2021. The Kermi Dark Edition collection is already following the mainstream trend "Black". It includes five product ranges where the standard items are made in a sophisticated black Soft look.

Kermi is convinced that the fresh and elegant white Soft will also shortly be setting the tone in many bathrooms. Thus, in 2020, Kermi presented the "White Line" product range to celebrate the 44th anniversary of Kermi Duschdesign with a special promotion price. In 2021, Kermi will continue this unique campaign. The range consists four modern Walk-In versions in a fresh white Soft look, with individually sandblasted glass decors and easy-clear coating KermiCLEAN.

MEDIA INFORMATION

Picture: The four Walk-In versions of Kermi's unique White Line in a fresh white Soft look.

The sand-blasted strip H-Line and V-Line decors which were presented for the first time with White Line are so well received that in 2021, they will be available via KermiEXTRA for all product ranges. These decors give the shower enclosures a fresh and trendy look and make them an absolute eye-catcher in the bathroom.
